

REMARKS

The Office Action mailed August 6, 2008, has been carefully considered. Within that Office Action, claims 1-36 were rejected. The Applicants herein amend claims 1-36. Reconsideration in view of the above amendments and the following remarks is respectfully requested.

By this amendment, claims 1-36 are amended above so as to more clearly set forth and distinctly claim the novel and patentable features set forth in these claims. In particular, the claims are amended to eliminate an alleged discrepancy perceived by the Examiner in regard to the "number agreement" with respect to the "first, second and third inputs of the controller and the first and second positions that the cursor is stopped at" and descriptive language from the preamble of the claims has been imported into the body of the claims. In addition, as suggested by the Examiner, the alternative language "club swing/shot mode" as previously used in the claims is also amended above to recite either a "swing operation" or a "shot mode".

A "clean" copy of the Applicants' claims as amended is provided in an attached appendix as a courtesy to the Examiner.

The above amendments are fully supported by the original disclosure and, thus, no new matter has been added. If the Examiner should disagree, however, it is respectfully requested that the challenged amendments/limitations be pointed out with particularity in the next Action so support may be cited in response.

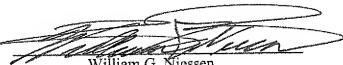

COPY

It is believed that the above amendments and remarks place the above-identified patent application into condition for allowance. A formal indication of allowability is earnestly solicited.

The Commissioner is authorized to charge the undersigned's deposit account #14-1140 in whatever amount is necessary for entry of these papers and the continued pendency of the captioned application.

Respectfully submitted,
NIXON & VANDERHYE P.C.
